

SOIL & GROUNDWATER ASSESSMENT & REMEDIATION SERVICES

New England Environmental, Inc. (NEE) offers Licensed Site Professional (LSP) services for the assessment, remediation and monitoring of contaminated soil, groundwater and indoor air. We supervise the removal of underground storage tanks, the closure of underground injection wells, the excavation and disposal/recycling of contaminated soil, and the implementation of numerous types of remediation activities. These activities are conducted to attain closure (large and small) of hazardous waste sites. NEE has experience with Brownfield Investigations, and offers site-specific assessment and closure services to assist both private and government clients.

NEE's Services Include:

- Environmental Site Assessment
- Soil & Groundwater Remediation
- UST & Drywell Removal
- LSP & Massachusetts Contingency Plan Services
- Groundwater Modeling
- Groundwater Discharge Permit Applications
- Hydrogeologic Studies & Review Services
- Water Supply Permitting
- Geotechnical Site Evaluations

Leaking Underground Storage Tank removal.
